Subject: Bat data will be submitted by Dow. RE: 2,4-D choline - info on Indian Bat

Hi Monica.

We met with Dow today to discuss the 2,4-D submission. In attendance from EFED were Faruque, Meghan, and Ed. Ed asked about the Indiana Bat data. Dow said they will submit it. We will send it to you after it clears Front End Screening.

Thanks.

-Mike

Hi Kay,

Yes we did receive MRID 49199101 and are reviewing that information. Regarding the Indiana Bat ESA information, is it possible to touch base with Dow and ask when they are planning to submit it?

Deliberative

Deliberative

Thanks,

Monica

Hi, Monica,

I don't see it yet...we did just get something in from Dow on the choline product, but it appears to be a document about extrapolation of the drift reduction potential with various nozzles, and validation with field drift deposition data. Not sure if you already got a copy of that or not...I believe you did, it's MRID #49199101.

Thanks,
Kay

Subject: 2,4-D choline - info on Indian Bat

Hi Kay,

As I mentioned in my VM, can you please let me know the status of information Dow offered to provide regarding the 2,4-D choline endangered species assessment? I believe the registrant said they would provide information on the Indian Bat to help with our ESA, and I'm wondering if you know when that will be coming in.

Much appreciated,

Monica Wait
